Welcome to the December edition of Nortech's eNewsletter. We would like to wish all our readers a very Happy Christmas and a Prosperous 2014. If you would like to comment on any of our articles or if you would like more information, please email us at info@nortechcontrol.com

Out and About

Nortech Has Been Very Busy at Heathrow Recently

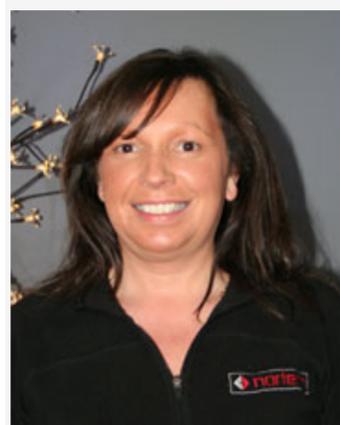

The broad spectrum of Nortech solutions installed around Heathrow airport illustrates the breadth of our engineering capability. They range from an automatic boarding card checking system at the Virgin Airlines executive lounge through terminal-wide access control management to car park occupancy management.

Recent months have seen a lot of activity at Heathrow with the completion of the [NorParc](#) car park occupancy counting system in the short stay car park at Terminal 4, and the system upgrade to [Norpass3](#) for the access control system protecting the UK Border Force facilities at Terminal 5. Both projects went smoothly and the end users were delighted with the results.

Let's hope that we can continue our successful support of the UK's premier airport.

Staff News

Athletic Sharon Sprints Past a New Milestone

Congratulations to Sharon Watkins, a production operator at Nortech, for receiving her 10 year service award. Sharon is a keen athlete and enjoys running and watching rugby (not at the same time). She is also the Child Welfare officer at the local Barracuda swimming club where her 12 year old daughter is well on her way to becoming the next Rebecca Adlington.

Sharon enjoys singing at work but her colleagues agree that she won't be entering the X Factor any time soon and should concentrate on her athletic strengths.

Looking Forward to IFSEC 2014

Now that 2013 is coming to a close, we are already looking forward to the challenge of meeting our business targets in 2014. In particular we're eagerly awaiting the opportunity to present our stand at IFSEC 2014 at its new venue at the ExCeL in London's docklands. It's always good to touch base with our customers, suppliers and technical partners at the same time as showing off our new products and features to the security community.

Solutions

AVI – Choose the Right Solution

We know what a headache it can be finding the best vehicle identification solution for your customer. The most popular or what they feel is the most appropriate is not always the best solution. With many years' experience in the automatic vehicle identification business Nortech knows that offering the best quality equipment and the right equipment for the job will avoid unforeseen problems later on.

If you're not sure whether to offer ANPR, UHF vehicle tagging or microwave vehicle tagging, feel free to contact us so that we can explain the benefits, risks and costs involved in each system. Nortech offers the best quality Nedap products; [Nedap ANPR](#) system, [uPASS Reach](#) UHF vehicle identification and the [Transit](#) Microwave vehicle identification.

We also offer free tailored training courses that discuss the technologies involved and how & where to apply them plus guidance on correct installation with practical hands-on training.

Contact info@nortechcontrol.com to check if you need information on the products or if you would like to attend an Automatic Vehicle Identification training course.

Product News

2013 - An Interesting Year for Norpass3

We have recently seen the release of the latest version of Norpass3, our online access control system. Norpass3 continues to evolve with more and more useful features for both installers and end users. Recent new features include the dedicated accommodation feature that enables quick and easy access assignment of individual card holders to specific rooms alongside their standard access rights for the rest of the premises. The new 'Visitor PIN' feature offers a simple way of providing temporary dedicated access rights for individual visitors.

As the product is growing in functionality, we are pleased to see that it is being used in many diverse applications. New Norpass3 installations in 2013 include care homes, construction sites, manufacturing, hospitals, airports, marinas, schools and further education colleges.
