Nortech Control to Partner Up with Thinking Software.

Nortech is pleased to announce that it is working towards integrating [Nortech's Norpass3](#) with Thinking Software's popular "Rota Horizon" Workforce Management and Time and Attendance software. It is the ideal system to manage time and attendance monitoring, human resources compliance and workforce resource planning with Nortech's Norpass3 Access Control system.

The [Rota Horizon software](#) can import employees, reader information and access events directly from your Access Control system. As soon as your employees start using Nortech's Norpass3 Access Control System with the software, the Time and Attendance data will start to flow into Horizon automatically without the need for separate data collection devices or cards.

HD Number Plate Reading Offers Accurate Long-Range Identification

A new high definition automatic number plate recognition system (ANPR) is being launched to the UK market promising vehicle identification at up to 10 metres.

The new ANPR HD vehicle identification system for vehicles comes with a high definition camera and powerful infrared LED lighting to enhance number plate recognition. It is designed specifically for access control and free flow (barrier-free) entry applications, such as commercial car park facilities, corporate sites, visitor management applications, retail parking and airport parking.
