Welcome to the Summer 2015 edition of Nortech's eNewsletter. We hope you find the below articles interesting and informative. If you have any feedback or questions we'd be more than happy to hear from you on info@nortechcontrol.com.

Quality

ISO9001 Renewal Achieved Successfully

Recently, Nortech had its external audit for the ISO9001:2008 – which we passed without any concerns raised. In fact this year was an improvement on previous audits. In the closing meeting, the auditor made many positive comments about the company and staff too.

Richard Aitkenhead, our Quality Management Representative would like to thank all Nortech staff for being aware of ISO9001. Also, he would like to thank them for following the procedures, and helping both himself as well as the external auditor from the preparation stage to the audit. Well done!!!

Events

Another Successful IFSEC – Off To Newcastle In July

It was great to catch up with some of our customers at IFSEC again this year. While there, we successfully showcased our latest [ANPR HD](#) and TRANSIT Ultimate Long Range Identification units.

Our Technical Support team were also fully engaged. They offered customers live demonstrations of all the latest features of our [Norpass3 access control system](#). That included showing the software's ability to control up to four doors from a single box, which is a feature that really saves money.

Also as the show ended, Nortech's raffle was drawn. We are pleased to announce that the winner of the Moët & Chandon Brut NV Magnum has been notified.

If you missed us in London, you can see us soon. Nortech will be moving up North on the 9th July for the Security TWENTY 15 conference taking place at the Gosforth Park Marriott Hotel in Newcastle upon Tyne. There will be free bacon butties on arrival and a complementary lunch.

Products

Introducing the TRANSIT Ultimate

Now you can get an exciting new Automatic Vehicle Identification (AVI) unit here. The TRANSIT Ultimate by Nedap Identification Systems succeeds the proven TRANSIT Standard model, which has already been deployed successfully in the thousands across the world.

The TRANSIT Ultimate retains all the [TRANSIT Standard](#)'s good points. Yet it also offers a range of new features including improved security using tag authentication with AES encryption, advanced antenna design, bi-directional communication and new housing that is robust as well as stylish. It also includes a 3-colour LED indication.

The TRANSIT Ultimate comes with a range of new transponders, while being backwards compatible with existing TRANSIT Standard installations.

Contact the Nortech sales team for more information and availability.

Staff News

Staff Training

There's been a hive of training activity at Nortech over recent months. Certainly, they have been attending professional sales training sessions to improve their sales and customer support techniques. They have also received regular product training classes to build their product knowledge for Nortech's complete product range.

Production and administration staff also attended the product training classes. Now, the whole workforce has a good basic knowledge of the products that Nortech manufacture and distributes.

Company News

Meet a Brand New Nortech

Get ready for Nortech's new look. Right now, we're updating our company's brand, and over the coming months, we'll be unveiling the new website. What's more, we'll be launching a web shop too. That should make it even easier for you to find what you need, and we also hope that the new brand will help us better convey our image as a supplier of excellence. After all, we have some strong expertise here:

- We have a diverse team of engineers brimming with talent and experience.
- We use new technologies that enrich our customers' projects.
